

Tips & Tricks

With Google Maps app, download a map and use it offline

If you're going where mobile data is expensive or you won't have an Internet connection, you can save a map to your device and use it when you're offline. Here's how:

1. Make sure you're connected to the Internet and [signed in to your Google account](#).
2. Open the Google Maps app 🗺️
3. Search for a place, like "Zürich".
4. At the bottom, touch the bar that has the name of the place you searched.
5. In the upper right, touch the menu ☰
6. To save the map, select **Save offline map**. And follow the directions on the screen.

Tip: The biggest size for an offline map is 50 km x 50 km. If you try to save an area bigger than that, you'll be asked to zoom in to a smaller area.
